## MULTIFORM INFINITY

Unique Infinity is a collection inspired by the black brecciated quartzite from Brazil also known as Negresco. The stone's natural structure, with stippling alternating with larger more neutral areas, gives the new Oasis collection the distinctive visual impression of multiform infinity. Unique Infinity offers two textures, Unique Thar and Infinity Roxx, extremes that attract and complement each other offered in Six colours, with the Brick Linner decor to complete the collection.

## NATURAL HARMONY

Ceramic materials with infinite possibilities, intended to make design a carefree pleasure. Infinity Roxx offers a texture with large areas of the same shade, run through with sparse, precisely defined veins. Unique Thar, on the other hand, has the many inclusions typical of an agglomerate, and the veins are more frequent and regularly spaced. Together, they are the ideal combination for designing spaces with an air of harmonious completeness. Available in 6 shades, Beige, Rusty, White, Dove, Grey and Black, Unique Infinity ceramic stone is outstanding in its density of details, always accurately derived from many-faceted nature, and its distinctive natural refinement.

The Brick Linner three-dimensional decor is offered in the 60x120 size; its distinguishing characteristic is the runs vertically, the basis for striking compositions that harmonise to perfection with the collection's other surfaces. Brick Linner's geometrical design was styled with great care to enable the lines to flow without a break and emphasise the vertical axes of walls to visually increase their height. The resulting effect is compact and extremely dynamic.
